

CHECKPOINT B

Once again it is time to check your progress and make sure that you are on pace to move forward. Please check your warm-up tempos with those listed in the back of this book. You need to reach the tempos listed at Track #9 before you proceed further. You may also choose to play these each week with the corresponding track on the CD. In any case, the listed tempos need to be played with some degree of comfort.

Here are a few lines that include most of what has been covered thus far. The next page contains three short musical etudes that attempt to review your progress.
